

*Connecting Communities
Strengthening Democracy*

It's still 2010 Year of Women in Local Government so keep celebrating...

The VLGA has designed and produced two items which local governments and community groups can use to promote, celebrate and encourage women to 'think local government'. Both items are available for order in small numbers.

VLGA encourages you to borrow the design and messages, with acknowledgment, for your own products. Concept designs are available from VLGA (details below).

VLGA bookmark

This VLGA bookmark articulates why local governments need women and how their vitality strengthens local governments and communities.

VLGA wearable message

The VLGA Women's Policy Advisory Group created this wearable message. The high quality wooden 'jigsaw piece' with pin presented on a gift card features the international women's colours of white, purple and green, with the colour gold representing women in local government and women in communities working together.
